

# Marcus & Millichap Dallas

Marcus & Millichap is one of the leading commercial real estate companies in the country. Their Dallas office is headed by Vice President of Investments and Senior Director of the National Multifamily Housing Group Nick Fluellen. With an emphasis on multifamily property of all sizes, Marcus & Millichap's Dallas office uses their website to provide added value to both sellers, investors, and investors' agents.

Marcus & Millichap approached Oso Studio when their former web development partner was unable to complete development of a custom plugin. We were able to step in and complete the plugin on budget and on schedule. Their custom plugin protects sensitive property documents and integrates with their email marketing platform to allow for ongoing contact with prospective investors. After completion, Oso Studio has been retained for ongoing support and maintenance.

As part of our ongoing support, we completed a security audit revealing several major vulnerabilities opening their site to hacking. To close these holes, we setup a new WordPress install, updated and replaced vulnerable plugins, removed unneeded files, and secured their server.

The results of this project have been a significantly faster website that now loads in 500-600ms and a more stable and secure WordPress site that allows Marcus & Millichap to collect investor leads and better serve their represented sellers by entering escrow faster.

Everyone on the team loves the plugin and how much easier it makes our lives. And the fact that our site now loads so much faster is amazing! This is why I keep turning to Oso Studio again and again for all my WordPress needs.

**Kirk Tardy, Marketing Manager**
